

Vowel Count Using String Operations

D1262092 陳彥勻'

This is a really difficult assignment in my opinion, there's a lot of use of pointer which is the weakest part of my C programing, I don't really 100% understand how it works and when should it be used, and there's many parts of this assignment, it's not simple and it's complex.

The most difficult part I think is that about the files opening and alloc, it's not hard to code but the concept is not easy to understand, but through my friends and Youtube video's help, I finally manage to understand them.
